

# Impact Report 2023

Our mission is to advance the understanding of weather and climate and its application for the benefit of all.

## ENGAGE

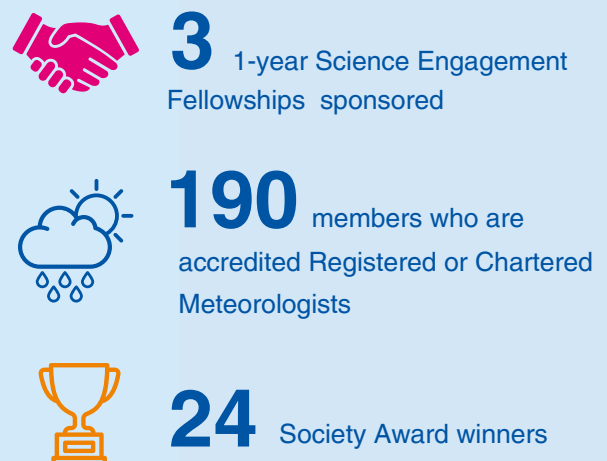

## ENTHUSE

## EDUCATE

## EMPOWER

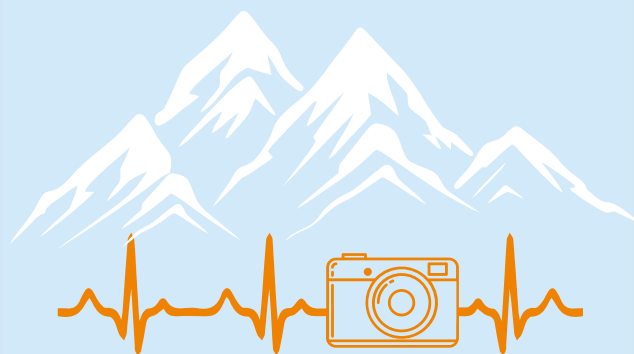

## Ensuring Quality Climate Education

The Society unveiled its **Quality Control Framework** for climate change teaching resources. This invaluable initiative is benefitting **both students and educators**, enhancing the quality and effectiveness of **climate education**.

## A Picture Speaks a Thousand Words

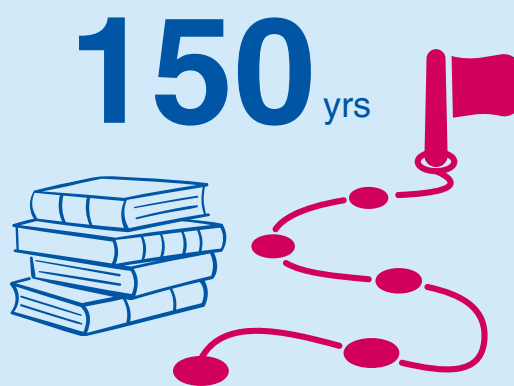

**3,238 entries** were received from **94 countries** for the **Standard Chartered Weather Photographer of the Year** competition. Educational weather and climate content relating to the competition reached **12.5 million people** on social media.

## Improving Equity, Diversity and Inclusivity

Members gave their views in the Society's **Equity, Diversity and Inclusivity survey**, conducted as part of an ongoing commitment to create a more inclusive environment, where **every individual** has an **opportunity to thrive**, regardless of their background or circumstances.

## Quarterly Journal: A Historic Milestone

The Society celebrated **150 years** of its Quarterly Journal, reflecting on the **journal's historical significance**, its role in shaping the discipline and its **increasing importance** in the face of **modern climate challenges**.
